Agenda Item No. 2.d.

AGENDA ITEM: Accept and ratify renewal of medical benefits, dental, vision and term life coverage with existing providers, Blue Cross Blue Shield of Oklahoma and Equitable.

I. BACKGROUND/DESCRIPTION:

Blue Cross Blue Shield and Equitable are the current providers for health, dental and vision coverage. The only provider change would be moving term life to Equitable from Standard.

The Blue Cross Blue Shield (BCBS) medical plans will renew with no plan design changes; however, premiums will increase by 19.5%. The City will maintain its current contribution structure, covering 70% of the top-tier plan and 80% of the base plan. Copays, coinsurance, and overall coverage remain unchanged.

The premium increase is driven primarily by a 118% claims loss ratio and an 88% increase in prescription drug costs.

The City explored alternative carriers, but all other major providers declined to quote or did not submit competitive proposals.

For the upcoming plan year, the City will implement a spousal carve-out provision, which includes a \$75 per pay period surcharge for spouses who have access to other coverage. Spouses without access to alternative coverage will remain eligible without surcharge.

Dental and vision benefits will renew with Equitable with no changes. Additionally, term life insurance will transition from The Standard to Equitable to leverage bundled cost savings and streamline plan administration by consolidating benefits under a single provider.

The increase in benefit premiums has been budgeted.

II. RECOMMENDED ACTION:

Accept and ratify renewal of medical benefits, dental, vision and term life coverage as

presented.

AGENDA ITEM: Discussion, consideration, and possible action to authorize the Chairman to execute a Task Order with WSB Engineering under the existing Master Service Agreement for Congo Creek Basin #1 – Drainage Design in the amount of \$117,545.00.

I. BACKGROUND/DESCRIPTION:

In September 2024, the City of Chickasha executed a Master Service Agreement (MSA) with Meshak Engineering, which was acquired by WSB in November 2024. The MSA provides support for implementing priority projects from the City's Master Drainage Plan and strengthens eligibility for state, federal, and private funding opportunities.

The Congo Creek Basin #1 project area - located along Pondridge Road and Scissortail Lane - was identified during the scoping phase as a priority flood-risk location. Recurring street flooding continues to affect public infrastructure and adjacent private property. WSB is prepared to begin design and implementation of the recommended drainage improvements.

The proposed scope of services includes hydrologic and hydraulic analysis to evaluate conceptual drainage alternatives (Options 1, 2, and 3), topographic survey and site investigation, final design plans for the selected improvement, and bidding and construction phase services.

Memo

To: Mayor & City Council

From: Omar Fierro, Director of Public Works

Date: 05-04-2026

Subject: Approval to Purchase Laboratory Equipment for Water and Wastewater Treatment Facilities

Background: The City's Water and Wastewater Treatment Plants rely on laboratory testing to ensure compliance with state and federal regulations, as well as to maintain the safety and quality of drinking water and treated effluent water. Currently, the City does not own the laboratory equipment used for these functions. All existing equipment belongs to U.S. Water, the current contract operator.

Due to laboratory services being subcontracted for many years, the City has not previously invested in its own equipment. However, ownership of this equipment is a fundamental component of utility operations and long-term sustainability.

Analysis: Staff has evaluated current laboratory needs and identified critical equipment required for both facilities. The proposed purchase includes needed instruments and tools necessary for routine sampling, testing, and reporting.

The new equipment will:

- Establish City ownership of essential laboratory assets
- Improve accuracy and consistency of test results
- Ensure continued compliance with regulatory requirements
- Support proactive maintenance and monitoring of treatment processes

Quotes were obtained from qualified vendors to ensure competitive pricing and compliance with procurement policies.

Fiscal Impact: The total cost for the purchase of laboratory equipment will not exceed **\$71,440.50**. Funds are available within the approved budget for Water and Wastewater operations.

Recommendation: Staff recommends that City Council approve the purchase of laboratory equipment for the Water and Wastewater Treatment Plants in an amount not to exceed **\$71,440.50**.
